

As part of the Transparency in Coverage Final Rule, all group health plans are responsible for providing public access to two machine-readable files that include negotiated in-network rates and out-of-network allowed amounts. These files will be in a standardized format and updated monthly. Carriers will be hosting and updating the files on their websites.

To comply with this rule, all group health plans must provide a link to the carrier's data files on an open-access website available to the general public (cannot have password or user account requirement, paywall, access limited to employees only, etc.). The link to place on your public website by 7/1/2022 is:
